

STUDENT SYMPTOM GUIDE

DAILY FAMILY WELLNESS CHECKS

Chico Unified follows the safety notification and protocols developed by Butte County Public Health (BCPH).

Attention Parents/Guardians -

Campus health and wellness begins at home. Butte County Public Health (BCPH) developed guidelines to assist parents in determining when students should be kept home. **Students utilizing the in-person instructional model should perform daily wellness checks prior to entering school campus.**

Daily Wellness Checklist -

- **Temperatures must be under 100.4** without the use of fever reducing medication (such as Tylenol, Ibuprofen, etc.) **for 24 hours prior to attending school.**
- **Temperature checks should be performed daily.**
- **Screen your child daily for potential COVID-19 symptoms** or exposures utilizing the student symptom decision tree below.

Student Symptom Decision Tree

Low-risk: general symptoms

Keep children home until they are **symptom free for 24 hours.**

High-risk: red flag symptoms

Contact your child's primary care provider. **Students should remain home until they have been symptom free for 10 days or until they receive a negative COVID-19 test (if no known COVID-19 exposure has occurred).**

- If your child has a **low-risk symptom**, keep them home until they are **symptom free for 24 hours.**
- If your child has a **high-risk symptom**, keep them home and **contact your child's primary care provider.** Students cannot return to school until they have received a negative COVID-19 test or have been symptom free for 10 days (*no known COVID-19 exposure*).
- If you are notified that your child has been **exposed to someone with COVID-19, do NOT send them to school** until you receive clearance from Butte County Public Health.
